OVERVIEW

Problem Statement & Objectives

Why NutriBot?

Bridging the gap between people and reliable, personalized nutritional guidance using the power of Generative AI.

1

The Problem

People lack access to personalized nutrition guidance; online information is often confusing, unreliable, or requires expensive expert consultation

2

Growing Need

Healthy meal planning demands expert knowledge, and there is a rapidly growing demand for AI-powered intelligent health assistants

3

Our Objectives

Develop an intelligent nutrition chatbot that delivers personalized dietary recommendations and promotes healthy eating through conversational AI

ARCHITECTURE

System Architecture

Frontend

HTML, CSS & JavaScript user interface for entering queries and displaying AI responses

Flask Backend

Python-powered Flask server processes requests and bridges the frontend with IBM watsonx.ai API

IBM watsonx.ai

Granite Foundation Model authenticates via IBM Cloud API and generates intelligent, personalized nutrition responses

STACK

Technology Stack

Category	Technologies
Frontend	HTML, CSS, JavaScript
Backend	Python, Flask
AI Platform	IBM watsonx.ai, Granite Foundation Model
Configuration	Python Dotenv, REST API
Development	Git, Virtual Environment

Web Frontend

Responsive chat interface for seamless user interaction

AI Backend

Scalable IBM Cloud-powered intelligence engine

WORKFLOW

How NutriBot Works

NutriBot seamlessly connects the user's question to a powerful AI engine and returns intelligent, personalized nutrition guidance in real time.

Key Capabilities

- **Natural Language Understanding**
Interprets free-text nutrition questions contextually
- **Personalized Recommendations**
Tailors dietary advice to the individual user
- **Real-time AI Responses**
Instant answers powered by Granite Foundation Model

Dark Mode

Meal Planner

Generate AI-powered personalized meal plans

Plan Settings

Plan Duration

1 Week

Diet Type

Balanced (All foods)

Primary Goal

Maintain Weight

Regional Cuisine Preference

Pan-Indian (Mixed)

Additional Preferences

e.g., no onion-garlic, quick meals under 30 min, budget friendly...

Your Meal Plan

Configure your preferences and click
"Generate Meal Plan" to get started.

The AI will generate a personalized meal plan based on your profile and preferences.

NutriBot

Ask anything about nutrition, meals, health...

👋 Hello! I'm **NutriBot**, your AI-powered nutrition coach!

I can help you with:

- 🍽️ Personalized meal plans & Indian recipes
- 📊 Calorie & nutrition analysis
- ⚖️ BMI, macros & water intake
- 👨👩👧👦 Family diet recommendations
- 🌱 Weight loss / gain strategies
- 💊 Supplements & vitamins guidance

FEATURES

Features & Applications

What NutriBot Offers

A versatile AI-powered nutrition platform serving individuals, healthcare professionals, and organizations alike.

Key Features

1

AI Nutrition Assistant

Personalized meal suggestions and healthy diet recommendations via interactive chatbot

2

Intelligent Responses

Fast, accurate, AI-generated answers with secure IBM Cloud integration

3

User-Friendly Interface

Simple conversational UI accessible to all users without technical expertise

Applications

- Personal health management
- Fitness and wellness coaching
- Hospitals and clinics
- Dietitian support tools
- Educational institutions
- Corporate wellness programs

GROWTH

Advantages & Future Enhancements

Current Advantages

Available 24x7 with a user-friendly interface; delivers accurate AI-generated responses on a scalable, cloud-integrated architecture that improves nutrition awareness

Near-Term Enhancements

Voice-enabled chatbot, multilingual support, image-based food recognition, and a calorie tracking dashboard

Long-Term Vision

Mobile application, wearable device integration, and personalized health analytics for comprehensive wellness management

Conclusion & Thank You

Transforming Nutrition Guidance with Generative AI

NutriBot demonstrates how IBM watsonx.ai and the Granite Foundation Model can power an intelligent healthcare chatbot that delivers personalized nutritional guidance through natural language conversations.

Generative AI in healthcare makes nutrition advice more accessible, interactive, and efficient for everyone.

Project Impact

Practical application of Generative AI in healthcare, bridging the gap between users and expert nutritional knowledge

Technology Showcase

End-to-end integration of IBM watsonx.ai, Granite Foundation Model, Flask, and a responsive web frontend
